

数学 くり上がり下がりプリント # 4

年 組 号

氏名

56                      46                      19                      25                      28  
+14                      +37                      +11                      +18                      +24

① 次の計算をしましょう (くり上がりなし)。

51                      72                      44                      25                      40  
+47                      +20                      +32                      +71                      +53

78                      13                      83                      16                      36  
+11                      +70                      +16                      +13                      +51

② 次の計算をしましょう (くり下がりなし)。

52                      95                      95                      69                      99  
-20                      -31                      -70                      -28                      -43

48                      26                      98                      65                      76  
-24                      -10                      -21                      -42                      -44

③ 次の計算をしましょう (くり上がり)。

28                      48                      28                      22                      27  
+55                      +45                      +38                      +38                      +17

17                      47                      19                      67                      28  
+26                      +17                      +45                      +13                      +62

38                      31                      42                      66                      39  
+12                      +59                      +18                      +24                      +51

④ 次の計算をしましょう (くり下がり)。

80                      91                      60                      80                      71  
-48                      -77                      -17                      -58                      -23

84                      80                      91                      81                      52  
-38                      -45                      -17                      -46                      -16

96                      91                      76                      90                      81  
-19                      -69                      -38                      -26                      -47

82                      55                      92                      91                      51  
-13                      -19                      -15                      -49                      -32

⑤ 次の計算をしましょう (三桁くり上がり下がり)。

329                      125                      666                      576                      495  
+512                      +146                      +257                      +128                      +528

746                      996                      666                      533                      902  
-584                      -647                      -228                      -181                      -287
